SOUTH SUDAN – TURKISH EXHIBITION

ORIENT GROUP PROPOSAL

African growth and development is rising. After the Covid-19 pandemic hit the world in 2020, a lot of difficulties emerged; economic instability, poor health, infrastructural deficit and deficiencies in innovative materials. Many countries including South Sudan were affected drastically as there was a global shortage in manufactured good and services in almost every commercial sectors. Thus, this innovative solution was birthed to bring manufacturers, producers, businesses and customers together to have collaborative transactions and boost trade as this will promote and strengthen political, social, economic and cultural relations between Turkey and many African countries.

The genesis of Orient Group with good recommendations from the renowned Government has influenced and supported the initiative to be reviewed by the Government of South Sudan to boost trade and to also remove the barriers of growth and development through the first shipping company launched in Turkey by Orient Group, to ensure that all goods and services to improve the Turkish-South Sudanese trade are monitored effectively. As the initiator of this idea and innovation, demand and supply would be evaluated by Orient Group and technology will play a major role for accountability. Orient Group has the approval from appropriate ministries to assure honest and clear service to her country.

Orient Group would also be a mediator and partner to the South Sudanese embassy in Turkey to investigate the companies to work with in Turkey. Orient Group will boost tourism, investment promotion and opportunities for South-Sudanese citizens and promote the recognition of her country and its representation when Turkish people hear of South Sudan; this would promote the country globally. This exhibition would be annually and each Turkish company that would participate will pay a stipulated amount in order to advertise their products in the exhibition. This fee will also cover the hotel, security, feeding and tourism adventure for the companies coming into the country.

- The exhibition will create an opportunity for the companies to meet with the Chamber of Commerce in South Sudan.
- The companies will learn and experience the history and culture of South Sudan.
- They will also have access to hospitals in case of any medical emergencies. The comfort of our guests will be a major priority to build a good relationship. At the end of this annual exhibition, we hope to have:
- Improved the economy
- Better infrastructure
- Upgraded pharmaceutical sectors
- Innovative designs
- Integrated effective technology into our system
- Strong partnership between the presidents of both countries on all levels of development.
